9. Note the attached Information Disclosure State	ment(s)(PTO-1449) Paper No(s).	·			

10. Other: ____

Continuation of 5. does NOT place the application in condition for allowance because: the amendment filed 24 December 2003 is not found to be persuasive because the applicant argues that the Okumura reference does not disclose linking cells having a first region contacted by the gate electrode and a source region contacted by a source electrode. As stated in the response by the reproduced drawing of Fig. 7a, that the source electrode does not contact source region in the portion P region. That is erroneous, as can be seen the original and reproduced Fig. 7a the source electrode (41) does contact the source region (25) in the portion P region, It contacts the source on the left side next to the insulation film as well as contacting the other source regions. In addition it is erroneous that the gate electrode contacts the source region (25) as stated in the response on page 6. The gate electrode only contacts the gate leading region (27). Therefore the rejection stands in regards to linking cells and the source electrode contacting the source regions and the amendment of claim 1 just adds the limitaitions of claim 2 and are still rejection under the previous office action.
